

English Language Arts:

Mrs. Schilke (Language Arts): This week, both 7th and 8th grade students will continue working in their Unit 2 information research lab. 8th Grade will begin drafting their final project over their Environmental Studies Topic 7th Grade graders will be working on finishing their research questions. Students will be focusing on parallel and stringy sentences during their grammar lessons. A quiz over sentence fragments, run-on sentences, parallel sentences, and stringy sentences will be on December 11th.

Mrs. Stephenson- 8th Grade Lit.: This week we continued one-on-one conferences with students! Each student is receiving a “power goal” that they will individually work on to master reading skills at their level. This week, we deviated from our shared reading to take a deep dive into Latin and Greek prefixes, roots, and suffixes! Each day, students learned four new affixes or roots! If your student misses a day, recordings of each day’s lesson are up on Canvas. Thank you!

Mrs. Hagan-7th Grade Lit.:

This week, we will continue our research unit on Space! Your student(s) will spend ample time in my class researching and reading about their chosen space topic.

The weekly, signed student reading log is due Friday, November 13th. Please make sure they are reading 1.5-2 hours every week outside of school.

They will be given 20 new words to study this week, and have a quiz over those words on Friday, November 20th.

Please make sure they are studying outside of class. I’ve noticed the reading logs and quizzes are greatly affecting grades.

Please let me know if you have any questions.

Social Studies:

Mr. Burrell- 8th grade students created a quizziz activity over the Constitution and will present this to the class on Monday and Tuesday.

7th grade Geography students will present a slideshow to their classes on famous tourist attractions in Canada.

7th & 8th Grade Weekly

11/30-12/4

Math:

Mrs. Lechtenberg:

There is still quite a few missing math assignments. Please visit with you student to make sure they have things turned in!

7th Grade: Students took a Topic 2(Analyze and Use Proportional Relationships) test on Tuesday. This week we will go over those and have a chance to earn some credit back on the test. Then we will take some time to review operations with integers and rational numbers.

8th Grade: This week we will review how to solve multi-step equations and taking a quiz before starting the next lesson 2.5 (Compare Proportional Relationships).

Ms. **Boman:** 7th graders just started Topic 3 last week. We will continue with Topic 3 finding the percent of numbers and how percents and proportions are connected.

Science:

Mrs. McDaniel-

7th Grade - We will start talking about elements and subatomic particles. This is a continuation of our Matter Unit.

8th Grade - We are going to continue with our lessons on Forces and their interactions, but we are going to try a unit from a new curriculum the science department is exploring. (Amplify)
